

One and 2-Speed Evaporative Cooler Motor

Features:

Premium Moisture Resistance Windings (115 Volt)

The evaporative cooler motor provides all the features needed to insure long, trouble-free life under the high moisture atmosphere of evaporative cooler duty.

- Brass current carrying terminal board parts
- Class B insulation
- Continuous filtration of oil
- Electro-zinc plated governor parts, dust caps, terminal board cover
- Heavy magnet wire insulation
- High viscosity encapsulating varnish
- Moisture resistant terminal board
- No frame ventilation openings in the top portion of the frame
- Single and two speed
- 7-1/2" ring to ring dimension*

Applications: Belt Driven Evaporative Coolers

Readily acknowledged as the leading supplier to the residential and commercial evaporative cooler market, Century offers moisture resistant features including plated hardware and switch parts, fungus treatment and double dip varnish treatment. These features provide the best buy for the customer.
