TIPS ON SELECTING A REPLACEMENT GAS VALVE

Safety Warning: Any work on gas valves or equipment should be performed by a qualified service technician only. Please do not attempt any repairs or replacement if you are not qualified. Serious injury can occur from improper installation or usage.

Disclaimer: The cross references provided in this booklet are intended to be functional equivalents and not exact matches of products listed. Invensys Controls assumes no liability in connection with the information contained herein and makes no representations regarding the accuracy of any such information. Final selection of a replacement product is the sole responsibility of the buyer.

GAS VALVE SELECTION CHECKLIST GUIDELINES

Always check the following with any gas valve retrofit application:

1. Check capacity
2. Check inlet and outlet sizes
3. Determine if valve is non-regulated
 - a. Check if the pressure regulator requires adjusting
4. Determine if the replacement requires straight-thru
5. Determine if application is L.P. or Natural Gas
 - a. For L.P. gas, a separate pressure regulator may be required
6. Determine if the pilot needs to be plugged
7. Determine if valve is slow opening
8. Determine if a 620-402 transformer is required
9. Determine if the replacement shaft and hub will require assembly
10. Check OEM and replacement manuals for proper installation instructions

HOW TO READ AND INTERPRET A GAS VALVE LABEL

To identify your valve type, locate the red or white factory label on the valve body.

Note: It is essential to write down the nine-digit factory number correctly.

- Manufactured by
- Model Type
- Factory No. (9 digits) and Max. PSI Rating
- Regulator information
- Application information
- Robertshaw Part Number or OEM Number
- Date Code (Year 09, Week 23)

An OEM valve may have an OEM part number instead of the Robertshaw part number. The cross reference on the following pages will cross most nine-digit factory numbers or OEM part numbers to the Robertshaw numbers.

Gas valves with white labels are usually manufactured to be used on natural gas applications. Red labels indicate the valves are usually manufactured to be used on L.P. gas applications.

Any additional characters after the 9 digit factory number are used for shipping purposes and should be ignored when cross referencing.
