Fasco Celebrates 30 Years in Eldon, Missouri

The Fasco plant in Eldon, Missouri recently celebrated its 30th anniversary. The plant, which opened in 1975 when the company's Rochester, New York facility closed, manufactures and warehouses motors and blowers.

The anniversary wasn't only a milestone for the company, but for 35 employees as well. That's right—35 individuals have been with the Eldon plant since its early days in 1975. With 30 years of service each, that represents over 1,000 years of experience—from just those 35 employees! This is a great example of the experience and industry know-how you can find throughout the Fasco organization.

New Cross Reference Information for Existing Draft Inducers

We've recently identified 11 of our popular draft inducers that replace even more OEM models than we originally reported. The new cross reference details are in the chart below. These draft inducers are great items to keep in stock, since they replace multiple OEM parts.

NEW CROSS REFERENCE:
