

XANTUS PRODUCTS

Introducing the most advanced inject to hit the market!

Xantus Maximum Seal XL4 Inject

With our new ultra concentrated formula, we bring sealant injects to the next level. Don't throw away money on over priced injects; when you pick up Xantus you know you have the best, most advanced injectable sealant on the market.

Unlike most other products on the market, ours travels with the gas, which allows it to respond to leaks faster, and more effectively. Our Inject will permanently seal small holes located in the A/C condenser, evaporator, fittings, and metal line sets.

XANTUS PRODUCTS

Xantus *Maximum Dry XL4 Direct Inject*

- Converts the moisture in the A/C system into a synthetic oil that mixes with the oil already in the system
- Prevents acid build up and compressor corrosion
- Far less expensive than removing moisture through mechanical evacuation

For Use In:
heat pumps
split and mini- split units
packaged units
microchannel coils

Xantus *Max Air Enhancer XL4 Direct Inject*

- Enhance cooling properties of new and old A/C and refrigeration systems
- Reduces mechanical friction up to 1500%
- Removes the insulating buildup of oil and forms a conductive layer to improve heat transfer

For Use In:
heat pumps
split and mini- split units
packaged units
microchannel coils
coolers
commercial units

Xantus *Maximum Dye XL4 Direct Inject*

- Compatible with mineral, pag, or ester oils
- Highly concentrated fluorescent yellow dye
- In most cases, the dye is visible to the naked eye
- Comes in packs of 3
